JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

the entrance of any one who has no vaccine mark, and notify the parent or guardian of said pupil that vaccination is an indispensable prerequisite to admission to the public schools of the city.

SEC. 7. Whenever it shall be deemed necessary by the board of health to establish the true character of any disease which is suspected to be communicable, a medical examination of the person or persons affected by such disease may be ordered by said board. Any person or persons interfering with or refusing to permit such examination shall be guilty of violating this article.

SEC. 8. No principal, teacher, or superintendent of any school shall knowingly permit any child sick from any disease mentioned in section 1 of this article, or from any other communicable disease; or any child residing in any house in which whooping cough, chicken-pox, infantile paralysis, scarlet fever, diphtheria, measles, mumps, smallpox, or epidemic cerebrospinal meningitis, shall exist, to attend any school until such time as the board of health certifies to such teacher, principal, or superintendent that the said child may attend school without danger of communicating the disease to others.

SEC. 9. No person from any dwelling wherein a disease dangerous to public health exists shall take any book or magazine to or from any circulating library. The board of health shall inform the librarian of all cases of said diseases, and until a written permit is given he (or she) shall allow neither books nor magazines to be taken or returned from a dwelling where such cases exist.

SEC. 10. Any person in the city of Huntington having any communicable disease shall be isolated as the board of health may direct, and all buildings, clothing, property, premises, and vehicles which may be infected by emanations from such persons shall be disinfected as the board of health may direct. No premises will be disinfected after diphtheria until at least two negative cultures, taken on successive days, have been obtained from the throat of the patient, or from the nose, if a case of nasal diphtheria.

SEC. 11. No person shall knowingly bring or cause to be brought into the city of Huntington any person infected with any communicable disease, except upon a permit granted by the board of health.

SEC. 12. Whenever a placard shall be placed, showing the presence of smallpox, scarlet fever, or diphtheria, no person or persons, except medical attendants and nurses, shall either enter therein or depart therefrom without the permission of the board of health.

SEC. 13. Whenever a person having tuberculosis moves out of a house or an apartment, the attending physician, if there be one, or the active head of the family, shall so notify the board of health within 24 hours, and both the above-mentioned persons shall be held responsible for a violation of this section.

Domestic Animals—Communicable Diseases—Notification of Cases. (Ord. May 25, 1914.)

ART. 13. SEC. 14. Every veterinarian or other person who is called to examine or professionally attend any animal within the city of Huntington, having the glanders or farcy, rabies, tuberculosis, or other communicable disease, shall, within 24 hours thereafter, report in writing to the board of health the following facts:

- (a) A statement of the location of such diseased animal.
- (b) The name and address of the owner thereof.
- (c) The type and character of the disease.

Rabies—Care of Animals Affected with. (Ord. May 25, 1914.)

ART. 13. SEC. 15. Every animal which is mad, or which has hydrophobia, or which shows symptoms thereof, shall, if possible, be at once securely confined until the diagnosis is accurately made. Every animal that has been exposed to such disease
